Extending Electricity To Taftville Incidents in Society

Twenty-Five New Customers Expected from that End of the Town-Gas Service Improved in Laurel Hill Section

The extension of the electric light line to Taftville is underway by the gas and electric department, the wires having been run from a point near the Newton farm to about Prentice corner. By the extension five customers are now being supplied with electricity, and it is expected that within a short time there will be 25 new customers in that section.

This extension was brought about through a petition presented to the commissioners by William C. Kendali and sixteen others two weeks ago for the extension of the service to Taftville as there were many who desired it. The commissioners referred the matter to Supt. Bogue for an investigation of the desired extension and to learn the extent of the new business in sight. This investigation was so favorable that at the meeting of the commissioners this week it was yoted that the extension should be built, and work upon it was started right away.

In the gas department the work of putting in the new and larger gas main through Laurel Hill avenue from Winchester street to a point in front.
